Requirement to Have Library Card or Alternate ID

Registered card-holders are required to present their library cards in order to check-out items and to utilize self-service technology. Digital card-managing applications on smart-phones/mobile devices that are compatible with library barcode scanners or clearly present the library barcode number, are acceptable and may be presented for scanning at check-out or to access/make reservations on self-service technology. For most services, card-holders with valid and active accounts may present current photo ID (see Borrower Services for acceptable forms of ID) as an alternative to the library card or card-managing app.

Replacement library cards: If a library card is lost, or becomes non-functional (the barcode cannot be recognized by the scanner and/or the number is illegible), the library will issue a replacement card. The library will charge a fee to replace a card that has been lost. The fee will be posted and will increase as necessary based on costs of materials. Replacement card fee will not be charged to replace a card that has become non-functional (the barcode cannot be recognized by the scanner and/or the number is illegible); the patron must still have the non-functional card and must present it to a staff member to confirm that the card is non-functional.

Adopted by the Haddonfield Public Library Board of Trustees on February 28, 2017
